EDUCATION

- Bachelor's Degree in Computer Engineering**
Unisinos – Expected: 2028
- Associate Degree in Systems Analysis and Development**
SENAC – Completed: 2023
- Technical Training in Software Development and Data Science**
Alura – Ongoing

SKILLS

Backend Development

- C#, .NET, ASP.NET Core
- RESTful API Development
- Object-Oriented Programming (OOP)

Databases

- SQL, MySQL
- Data Modeling

Tools & Practices

- Git, GitHub
- CI/CD (basic)
- Clean Code, SOLID Principles
- Agile Methodologies (Scrum, Kanban)

Other Technologies

- Java, C++
- SAP ABAP (basic)

Languages

- Portuguese (Native)
- English (Fluent – Cambridge Certified)
- Spanish (Basic)

AWARDS & CERTIFICATIONS

- Cambridge English Level 1 Certificate
- MOSTRATEC 2022 – Finalist (4th place)
- FEBRACE 2021 – Finalist (Brazilian Science and Engineering Fair)

PROFILE

Computer Engineering student (4th semester) with a background in Systems Analysis and Development, focused on building scalable backend applications using C# and the .NET ecosystem.

Experienced in developing RESTful APIs with ASP.NET Core, working with relational databases (SQL/MySQL), and applying object-oriented programming and clean code principles.

Hands-on experience in debugging and root cause analysis within complex enterprise systems at SAP.

Fluent in English (Cambridge certified) and seeking a Junior Backend Developer opportunity.

WORK EXPERIENCE

Technical Support Intern - Supply Chain Management

SAP Labs Latin America

04/03/2024 - 04/03/2026

- Performed root cause analysis of technical incidents in SAP PP/DS and Master Data within complex enterprise environments
- Investigated system behavior using logs, debugging techniques, and cross-system analysis
- Collaborated with development teams to troubleshoot issues and validate fixes in production environments
- Managed incident queues and prioritization to meet SLA targets
- Communicated with stakeholders, translating technical issues into clear, actionable insights
- Created and maintained technical documentation, improving knowledge sharing and reducing recurring issues
